RYUZA SECURITY

Our mission is to provide organizations with actionable security intelligence and resilient defence through offensive security operations.

ABOUT COMPANY

We deliver specialized cybersecurity services driven by continuous research, enabling us to provide deeper assessments, greater accuracy, and more effective security outcomes against evolving cyber threats.

In an era of rapidly evolving **AI-driven cyber threats**, attacks are becoming increasingly sophisticated, adaptive, and difficult to detect. Organizations must continuously strengthen their security posture to stay resilient against emerging attack techniques and evolving adversaries.

FORGED FOR CYBER OPERATIONS

PSYCHOLOGICAL OPERATIONS CATALOG

Psychological Operations (PsyOps) are intelligence-driven activities that design and disseminate targeted information and narratives to influence the perceptions, attitudes, and behaviors of specific audiences in support of strategic, operational, or national objectives.

OPERATIONS CLASSIFICATIONS (BLACK OPS)

Here is the structured grouping of operations according to their purpose, strategy, or method of execution

STRATEGIC

Long-term psychological operations designed to influence perceptions, attitudes, and behavior in support of broader political or military objectives.

OPERATIONAL

Psychological Operations conducted to influence target audiences in support of specific campaigns, missions, or theater-level objectives

TACTICAL

Short-term psychological operations conducted at the battlefield or local level to influence immediate actions, morale, and decisions of target groups.

TRAINING PROGRAMME

Training for PsyOps will be provided **on demand based** on specific operational requirements and mission objectives. As modern conflicts vary across regions, audiences, and threat environments, organizations will require customized instruction tailored to their immediate needs.

Such training may include audience analysis, narrative development, influence strategies, digital engagement, and counter-disinformation techniques. Delivering PsyOps training on demand ensures rapid capability development, operational readiness, and the flexibility to respond effectively to evolving strategic and tactical challenges.

OPERATION COSTS

The cost of a psychological operation depends on the specific objectives, operational requirements, and the scope of the analysis phase. Factors such as target audience research, narrative development, intelligence gathering, platform selection, duration of execution, and monitoring complexity all influence the overall cost.

Since each operation requires a tailored strategy based on its goals and environment, costs can vary significantly depending on the level of planning, resources, and precision required.

CASE STUDY – CIA

CODENAME **DESERT STORM**

DESCRIPTION

CIA-produced leaflets were used during the Persian Gulf War (1990 – 1991). Copies of the leaflets were air-dropped over a selected area before an Allied bombing run. The leaflets gave the civilian people time to evacuate and encouraged the military units to surrender.

Operation Desert Shield was the 1990–1991 military buildup by the United States and coalition partners in response to Iraq's invasion of Kuwait. It marked the defensive phase preceding **Operation Desert Storm**, ensuring the protection of Saudi Arabia and the broader Persian Gulf region

SOURCE

[Persian Gulf War Leaflets – CIA](#)

CONCLUSION

Operation Desert Storm ended with a rapid coalition victory, liberating Kuwait and weakening Iraqi forces.

PAST OPERATIONS

CODENAME

A SILENT REMINDER

DESCRIPTION

the psychological operation which was conducted in response to the Pahalgam terror incident in April 2025 that resulted in the deaths of 26 individuals. It details the retaliatory measures taken by India, including military strikes and a counter-offensive propaganda campaign aimed at discrediting Pakistan by highlighting its historical association with Osama Bin Laden.

The operation involved extensive use of social media to manipulate public perception and generate global pressure against Pakistan, ultimately leading to significant diplomatic repercussions for the country.

This operation is designated **DECLASSIFIED**. The information contained herein is now accessible for public reference, analysis, and scholarly use.

PAST OPERATIONS

CODENAME

THE SILVER ARC

DESCRIPTION

The document details a psychological operation (Psy-Op) involving the murder of a social media influencer in Punjab, orchestrated by radical elements to provoke societal unrest under the guise of moral policing. It outlines the motivations, key players, and tactics used in the operation, as well as a counter-operation aimed at stabilizing the situation through targeted social media campaigns.

The aftermath indicates a shift in public perception against the conspirator, Amritpal Singh Mehron, following the counter-campaign's success in circulating awareness and mobilizing opposition to radical ideologies.

RYUZA - X

Ryuza X is a specialized division of **Ryuza Security** focused on psychological operations, strategic influence, and information warfare. The division is led by professionals dedicated to analyzing behavioral patterns, influence methodologies, digital perception management, and psychological aspects of modern cyber environments.

By combining intelligence-driven approaches with advanced research capabilities, Ryuza X aims to support strategic awareness, resilience, and adaptive cyber operations in an evolving digital landscape.

Psychological operations are critical in modern warfare because ignoring perception can lead to misinformation, manipulation and unexpected strategic results with potentially fatal consequences.
